iW Alternative SIF - REVO (the "Sub-Fund")

Class "P CHF" (LU2122383339), (the "Class")

a Class of a Sub-Fund of iW Alternative SIF, (the "Fund")

The Fund has appointed APIS ASSET MANAGEMENT S.A as its Alternative Investment Fund Manager, (the "AIFM").

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund's objective is to seek stable returns by dynamically adjusting exposures to equity and fixed-income risks depending on predictive convictions of the portfolio manager.

The Sub-Fund invests within two main long only broad asset groups which include international equity stocks and government bonds through index futures.

The underlying assets of these index futures are respectively the following equity and government bond indices:

- a basket of equity indices such as but not limited to EURO STOXX 50 Index, FTSE 100 Index, S&P 500 Index, TSX 60 Index, Hang Seng Index (Hong-Kong) and Nikkei 225 Index, and
- a basket of government bond indices such as but not limited to 10-year Euro German Bond, Long Gilt, 10-year Canada Govt. Bond, 10-year US Treasury Note (US), 10-year Australian Government Bond, 10-year Japanese Government Bond and 10-year Korean Treasury Bond.

The allocation of the assets of the Sub-Funds invested in the equity index futures and government bond futures may be adjusted on a daily basis based on a "risk-on / risk off" investment strategy consisting in increasing or decreasing the equity risk exposure of the Sub-Fund, respectively decreasing or increasing the fixed-income risk exposure depending on market convictions.

These market convictions will be determined by using a proprietary algorithm, the purpose of which is to analyze the predicted volatility of the equity returns versus the fixed income market returns.

The Sub-Fund will however seek long-only exposures but no short exposure. The Sub-Fund may also invest in OTC derivatives instruments for hedging purposes only.

The Sub-Fund complies with the diversification limits ruling the UCITS funds.

The Sub-Fund is actively managed but not in reference to a benchmark index.

Are there any other Particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavorable times or otherwise cause the Sub-Fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of

derivatives is greater than the amount invested resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

- Operational risks: The Sub-Fund may fall victim for fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the AIFM or by external third parties or may be damaged by external events, such as natural disasters.
