iW Precious Metal MINING Equities (the "Sub-Fund") is a sub-fund of Protea UCITS II (the "Fund")

Class P2-EUR-Cap (the "Class") - ISIN: LU1726320929

The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

The Sub-Fund is a high risk vehicle aiming to provide capital growth over the long term.

The Sub-Fund is actively managed and is not managed in reference to a benchmark index. The index Euromoney Global Gold Index (JCGMGGI Index EUR) is used for the calculation of the performance fee (payable to the investment manager). The benchmark index of the Sub-Fund is Euromoney Global Gold Index. It is mentioned for performance comparison purposes. The Sub-Fund does not track the index and can deviate significantly or entirely from the benchmark index.

The Sub-Fund will mainly invest in equities and equity related securities (including but not limited to convertible bonds, American depository receipt and global depository receipt) issued by companies worldwide which are involved in the mining of precious metals, such as gold and silver.

The choice of investments will neither be limited by geographical area (including emerging markets) or currencies in which investments will be denominated. However, depending on financial market conditions, a particular focus can be placed in a single country (or some countries) and/or in a single currency and/or in a single precious metal sector.

On an ancillary basis, the Sub-Fund may invest in any type of other eligible assets, such as equities other than those above-mentioned, structured products, debt securities, money market instruments, cash, or undertakings for collective investments (UCIs).

However, the Sub-Fund will:

- not invest more than 10% of its net assets in other UCIs.
- not invest in asset-backed securities, mortgage-based securities, distressed debt securities nor contingent convertible bonds.

For hedging and for investment purposes, the Sub-Fund may use all types of financial derivative instruments traded on a regulated market and/or

over the counter.

However, in normal market conditions, the investment manager intends to use options and futures offering an exposure to equities or currency derivatives (such as forward exchange contracts).

If the investment manager considers this to be in the best interest of the shareholders, on a temporary basis and for defensive purposes, the Sub-Fund may also hold, up to 100% of its net assets in liquidities as, among others, cash deposits, money market UCIs and money market instruments.

Dealing Frequency

The net asset value for this Class is calculated on each Business Day (the "Calculation Day"), on the basis of the last available closing prices. For any subscription or redemption request received by the Fund, prior to 4 p.m. Luxembourg time, on the business day preceding the Calculation Day, the net asset value calculated on the Calculation Day will be applicable.

Distribution Policy

The Class is cumulative. No dividend will normally be distributed.

Currency

The currency of the Class is EUR.

Risk and reward profile

Risk Disclaimer

- This current risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

- The risk category shown is not guaranteed and may shift over time.

- The lowest category, which corresponds to Number 1, cannot be regarded as being risk-free.

- The Sub-Fund does not provide any capital guarantee or asset protection measures.

Why is this Sub-Fund in this category?

The portfolio of this Sub-Fund consists essentially of equities or equity related securities issued by companies worldwide which are involved in the mining sector. The objective of the Sub-Fund is to achieve capital growth by using equity-linked investment strategies returns. Hence, the risk/reward profile of the Sub-Fund should correspond to a Very High risk category on the risk/reward scale.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

- **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.
- **Counterparty risks:** The Sub-Fund can conclude various transactions

with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.

- **Credit risks:** The Sub-Fund may invest in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.

- **Risks from the use of derivatives:** The Sub-Fund may use financial derivatives instruments which may result in the Sub-Fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Sub-Fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

- **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
